Website Scope and Purpose

www.opensourceils.com

The project website is an information portal consisting of the best resources related to open source integrated library systems focusing on Evergreen and Koha. The migration process has been divided into stages to aid in locating resources on specific topics.

Project Information

This website is a starting point for libraries seeking information about open source integrated library systems. It is designed to create a community where librarians new to open source can ask questions and get advice.

In order to make your first visit to our website easier, here is what is included in the main tabs:

**Home**—includes basic information about the website and project. It also has news feeds for Evergreen and Koha.

**Getting Started**—this tab is especially for those who are new to open source and aren’t sure whether Koha or Evergreen is better for them.

**Evergreen and Koha**—each of these tabs has secondary pages for each phase of migration, technical support, and community pages. These secondary pages include links to relevant resources.

**Other ILS**—there are other open source ILS besides Evergreen and Koha, and this tab provides information on the most notable options.

**Community**—forums for you to use to connect with other users of our website.

**Topics of Resources**
- Evergreen
- Koha
- Vendors such as LibLime, Equinox, and ByWater Solutions
- Individual experiences of migration
- Documentation

**Type of Resources**
- Newsfeeds
- Articles
- Blogs
- Social media pages
- Slideshows
- Screencasts

**Resources Origin**
- Official Evergreen and Koha Websites
- Libraries/Librarians
- Vendor Sites

**Community**
- Connect with other libraries
- Ask questions
- Give advice
- Discuss issues
